

I have been commuting between Austin and San Antonio for the past eight years. XM radio is the best thing to ever happen with my drive. I get to listen to my favorite news in the morning, Fox and Friends, and during their commercial breaks I switch over to any one of my presets to listen to some music. If it wasn't for XM Radio I would be bored to death listening to the same old dribble from the local radio stations. Since I have had my XM Radio I can't remember the last time I listened to local radio stations. There is so much variety on XM Radio, it's incredible. I often travel to other major cities (primarily Orlando and Tampa), being able to listen to their local weather and driving conditions really helps tremendously. Please, please reject the NAB's petition 04-160 and support XM Radio's ability to provide far superior programming than local radio.
